

**Interim Report 1 (Due October 10).** You should have completed Tasks 1-5 and have started thinking about 6 and 7. If you plan to work with real data, you should also have made significant progress on Task 7 (you should at least ensure that it is feasible to obtain the real dataset, transform it, and load it into your database). You need to include the following:

1. **Name of team member and their CU user account.**
2. A brief description of your **web portal**.
3. A plan for getting the data to populate your database and a snippet of sample data.
4. A **list of assumptions** that you are making about the data being modeled.
5. An **ER diagram** for your database design (draft version).
6. A **schema** for your database design: a list of tables with keys declared (draft version).
7. A description of the interface of the **web portal** (draft version).
8. **Work so far done:** The write up should clearly demonstrate what exactly you have done so far towards the completion of your project.
9. **Future Work yet to be done:** The write up should clearly demonstrate what exactly you plan to do [in quantifiable terms] towards the completion of your project, ideally it should include a weekly plan.
10. Name your pdf file as in Jane\_Doe\_Interim1.pdf and mail to [psriman@clermson.edu](mailto:psriman@clermson.edu) and [lfulle3@clermson.edu](mailto:lfulle3@clermson.edu) with the subject header “Interim Report 1, 4620/6620”
